

Group 42 Script Instructions

We have 3 different scripts: A5.py, testfile.py and input_partition_testing.py

How to run A5.py:

- Ensure that the database password and name is modified to the local database on your machine the parts of the code to be modified are found in lines 9 and 10
- The program is command line based and so all the controls are clearly labelled in the command line
- Here you can see the code for the block testing in the assignToTeam function

How to run testfile.py:

- Ensure that the A5.py file is in the same directory as testfile.py in order to work
- The execution for the white box tests is found below line 341 in the testfile.py code

White box test #2 executable is in file: "input_partition_testing.py"
